

ILESBUS

WHEN QUALITY COUNTS

  
[www.ilesbus.com](http://www.ilesbus.com)

## Who are we?

Our job is to reinterpret the existing one with our innovative perspective, and our design and functionality approach.

O

Our most valuable guide in this process is the expectations and needs of our customers. The vehicles we reinterpret with a magic touch in accordance with the requests of our customers turn into an innovative ikon which offers both a functional benefit and carries aesthetic values. It ideally meets the requirements of the area of use and always makes a difference.

## How we pro- duce?

By combining the design and production power we have with the latest technologies in our field, we provide your vehicle with the most suitable floor, wall, glass, door, ceiling, stair, and lighting accessories.

Additionally, we contribute to the people with disabilities for reaching more customized fields in transportation with our specially produced foot step, armchair and lifting (elevator) solutions.

Unique  
design,  
endless  
options!

We  
love  
design

Unique design,  
endless options!

It requires, no doubt, a  
continuous inspiration,  
and a profound creativity  
to give a spirit and  
character to a metal  
mass (industrial product)  
and to bring it to an  
extraordinary stand.

Our inspiration and creativity  
are nourished by extraordinary  
charm of the design. We process  
the essence of the impressive  
idea, which we have cultivated  
in all these processes, on the  
wings of the vehicles and we  
present them their freedom.

# What we mean by qualify

Each vehicle produced  
at the factory is a part  
of repetitively produced  
series of mass products.

We give our vehicles the value they deserve, the confidence they should bear, and the character they need. Each part we use, each screw we tighten and every drop of paint we spray serves an enormous purpose. It is because we shape the spirit of the vehicle you dream of. And, every soul in the universe is unique.

Additionally, we gather EU Type Approvals for all kinds of Ilesbus vehicles. We proudly put ourselves in a position to be first in the market with our quick actions on certifying our special designs. Ilesbus R&D engineers ensure our designs to qualify with necessary documentation for our clients to prevent any obstacles.

01

**Functional**  
The foundation  
of our business is  
functionality.

The main purpose of  
our job is to transform  
them into a more  
functional and more  
effectively used vehicle.  
More and more...

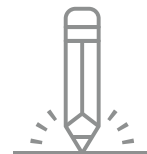

02

**Stylish**  
Or we believe  
in the power of  
aesthetic.

In our opinion, every object  
that is in contact with  
the human must have its  
share from elegance and  
aesthetics. Visual perfection  
is an indispensable element  
of the vehicles that directly  
serve people.

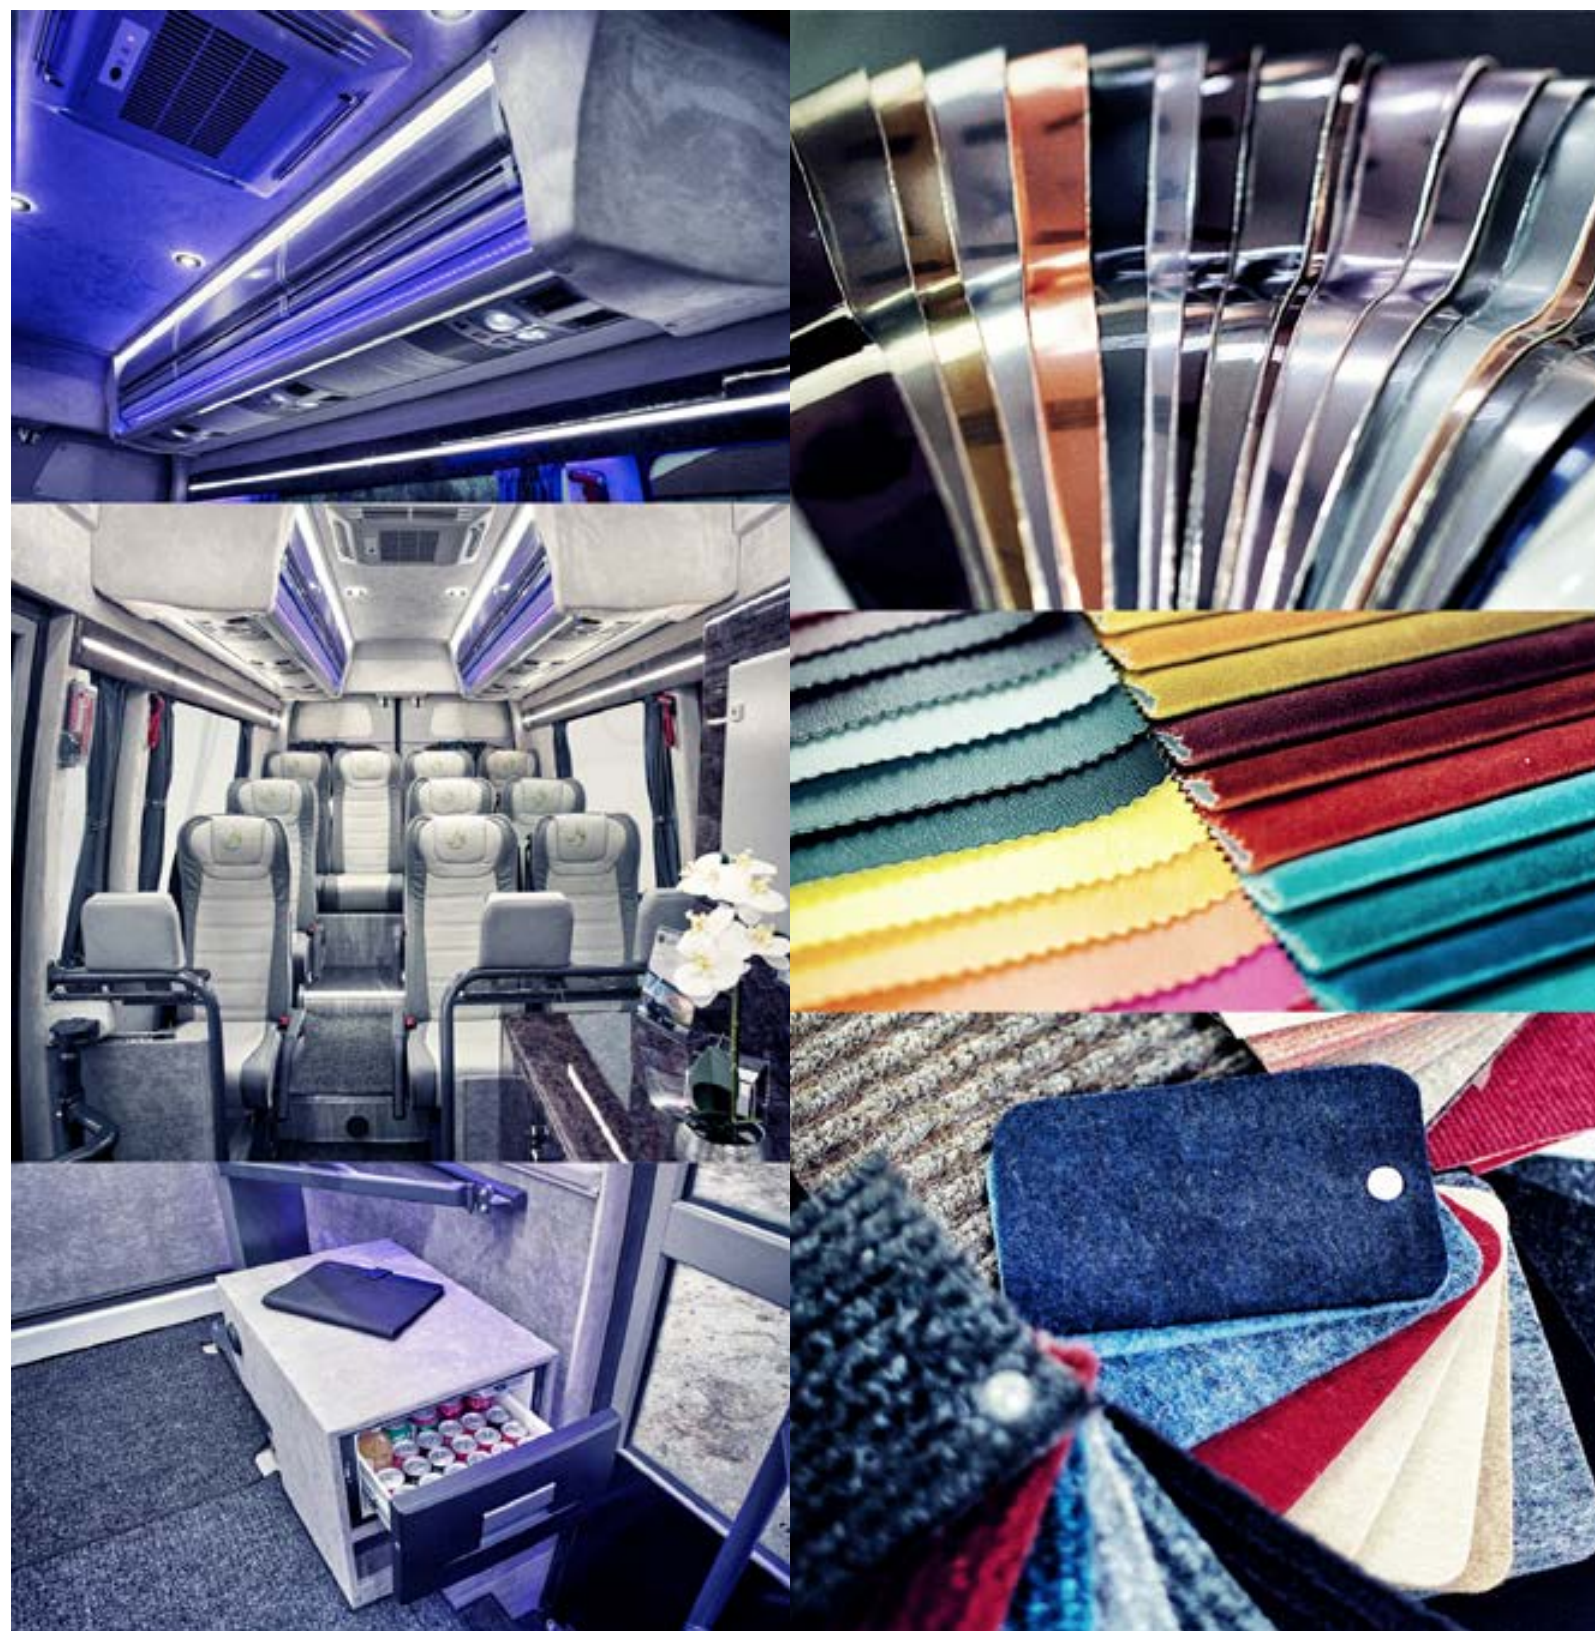

03

**Creative**  
Really. We  
mean, really  
creative.

It is not for us to only make  
routine and repetitive things.  
We love always looking from  
different perspectives, and  
finding solutions for every  
problem with a special sauce  
that we blended with our  
creativity.

04

**Customized**  
Every detail is  
customized for you

Each tool we get from  
contracted partners is reborn  
in our hands in accordance  
with your demands, like a  
baby... Every detail that  
will provide benefit for the  
user experience is carefully  
planned and skillfully applied.

05

**Extraordinary**  
Not imitating, but  
being a model.

We are different from the  
companies that do the same  
business around the world.  
Because, we continuously  
develop our distinctive design,  
production and application  
principles. We prefer to be a  
model instead of copying.

06

**Technological**  
Technology is like  
air, like water.

We use all the opportunities  
that the technology offers  
to all humanity until the  
end in all the processes  
of our work. We live and  
breathe with the technology  
in order to provide you with  
the most recent and best  
service together with our  
professional staff that is  
experienced in its field.

# RENAI- SANCE

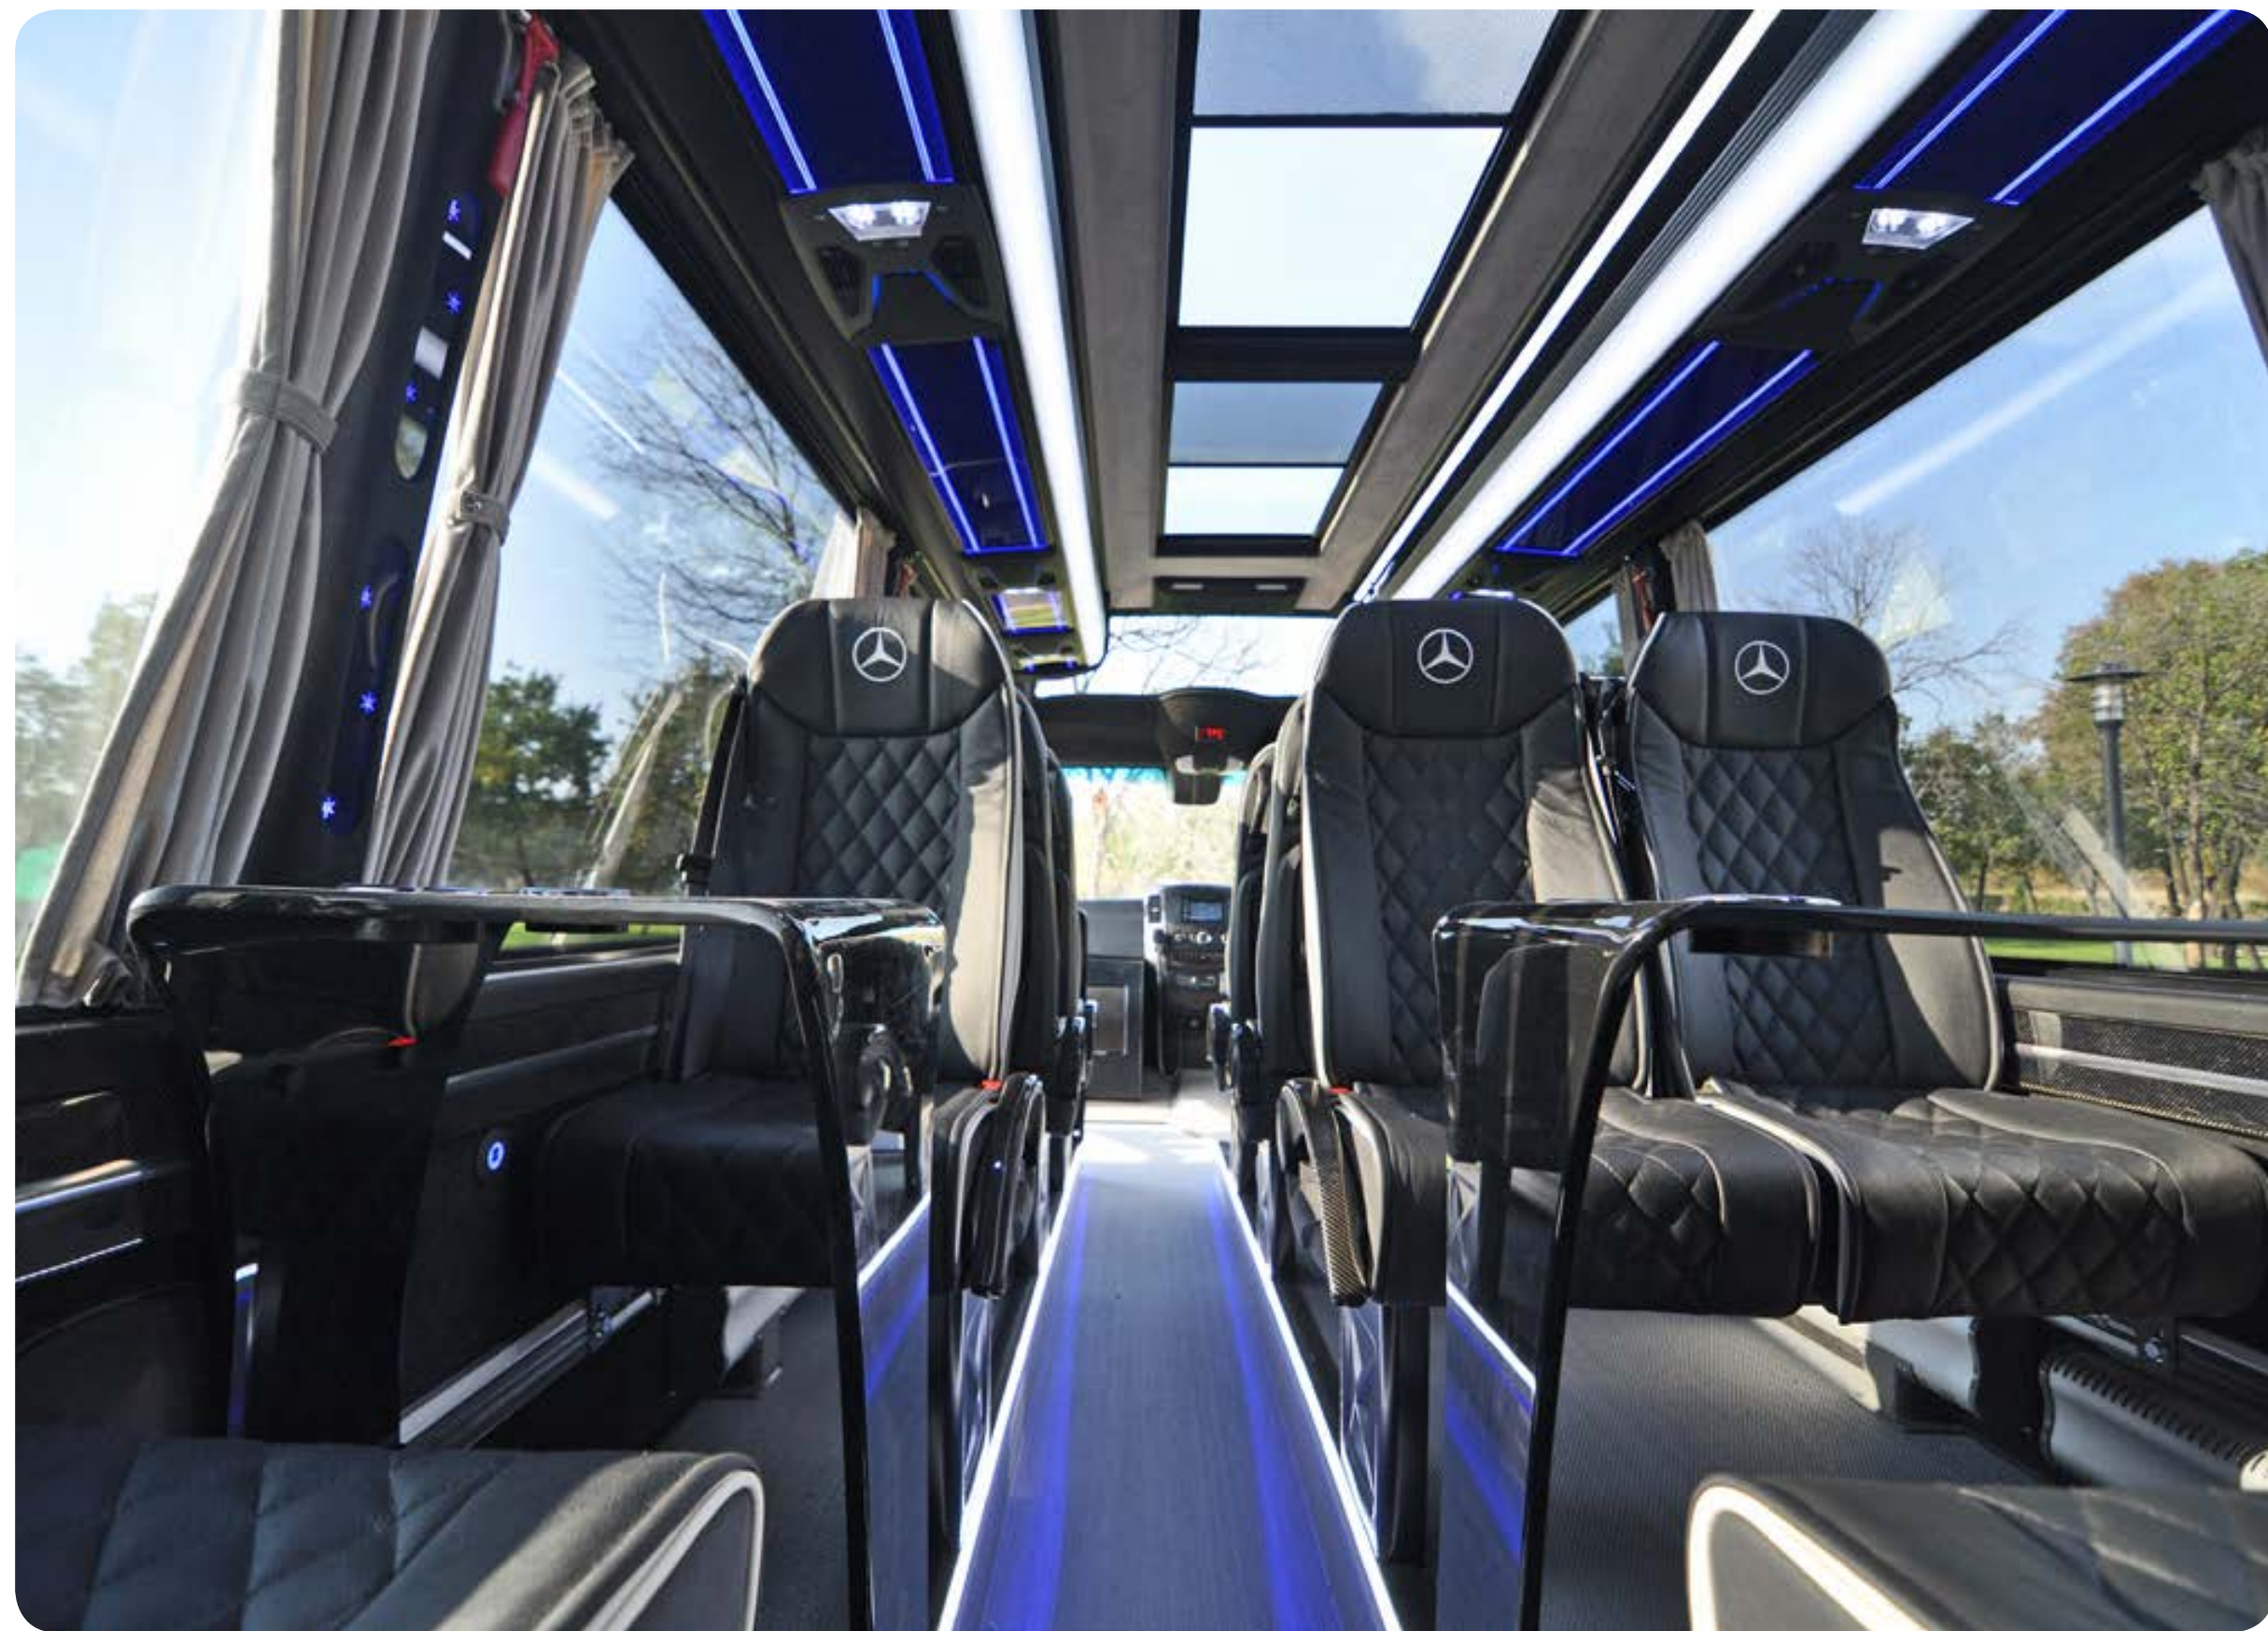

We have  
reconstructed  
the comfort!

Named as Renaissance, like  
the design revolution with our  
new projection and engineering  
work, all in our special look  
Sprinter.

Ilesbus design engineers  
continuously work on new  
designs considering the new  
perceptions with individual  
creativity.

Each hardware inside used for design represents a perfection in our buses. The best quality material preference together with the best workmanship makes it unique, in all details.

- 

Elegant design and having an unusual appearance with functional parts Revolution, offering a much more in-use experience than their counterparts.

○

Door blade and side windows are designed with inspiration from nature's miracle which named as Golden Spiral. Our engineers worked with geometrical series and resulted as total work of niche and eye-catching look.

IVECO  
SI

○  
We have  
reconstructed  
the comfort!

Designed by creativity and  
engineering, the Iveco  
Si to make the passengers  
feel comfortability and  
luxury at the same time.

Whether used for short journeys or longer trips, Ilesbus Iveco Si design, offers Ilesbus quality with all featured essentials for passengers use.

We as Ilesbus offer proudly new level of comfort, state of art design, incorporating dark double glazed privacy side glass, high capacity air conditioning, spacey inside, comfortable and stylish seats, new unique techno outdoor design with spacious luggage areas.

# TOUR- ISM BUSES

Tourism buses are designed with spacious areas on sides, and rear baggage places.

This design has many options for different door blades, different iso glass shapes giving customers choices on their requests and needs.

It also attracts with unique, sophisticate look in design with outside parts and inside we provide luminous design, comfort, luxury and quality together.

We build buses to answer all type of customer needs. Standard tourism buses have spacey areas as well as comfort and quality.

# ACCESSIBLE BUSES

Accessible buses make transporting easier for all beneficiaries. We have flexibility with design as options of VIP and middle class models. These buses have rear access by useful ramp or automatic lifts.

Flat floor buses can be used in Tourism, school buses and service sectors.

○  
We aim to  
provide comfort  
and quality in all  
pur lles buses.

# SPE- CIAL- BUSES

Just imagine,  
we turn dreams  
into reality.

You just share your dreams and  
leave the rest to us. Special  
Buses are for those whose  
dreams don't fit in standards...  
Yes, you are not ordinary but  
we are not too!

Hundreds of special different  
vehicle designs completed  
successfully are turning into  
Ilesbus signed tools with  
equipped master craftsman's  
comfort and technology.

○  
Do you want your vehicle in a different form than the standard, with a high ceiling or a special mechanism for your products?

# SCHOOL BUSES

○ Basic solutions,  
stylish look.

Ilesbus designs School Buses  
with perfect fit to kids. These  
buses are very basic but  
stylish design with best quality  
carroserie work.

○

These buses are  
also functional  
comfortable,  
serving to many  
different sectors.
